

CONGO WEEK **of LEARNING** and ACTION

Sunday, October 18-Saturday, October 24, 2026

Commemorating Lives Lost
Celebrating Congo's Potential.
Advocating for Peace, Justice & Human Dignity.

SOVEREIGNTY

CONGO WEEK XIX

Dear Participant,

Breaking the Silence Congo Week is a global teach-in and action that occurs each year during the third week of October. Launched in 2008, Congo week will take place from October 18 - 24, 2026. This year's theme is sovereignty - the Congolese people's dignified pursuit to control their land, resources, wealth, data and ultimately their affairs.

Congo Week commemorates the millions of lives lost in the Congo conflict while celebrating the enormous human and natural potential that exists in the country.

Each year, students, community organizers, faith leaders, scholars, intellectuals, artists, influencers and ordinary people throughout the world participate in Congo Week. Friends of the Congo has mobilized participants in more than 80 countries and 800 university campuses and local communities. Actions include film screenings, teach-ins, forums, rallies, fundraisers, concerts, and many other activities designed to break the silence around the Congo crisis and elevate the profile of the country throughout the world.

This Sovereignty Toolkit equips you with practical resources, daily themes, educational materials, and action tools to host impactful Congo Week events.

Join us this October by signing up at congoweeek.org.

In Solidarity,

Friends of the Congo Team

CONGO WEEK

We are not alone. Africa, Asia and free and liberated people from every corner of the world will always be found at the side of the Congolese.

LUMUMBA

Plan and Organize to Educate and Raise Awareness During Congo Week:

This Sovereignty Toolkit is a comprehensive, user-friendly resource designed to help organizers plan impactful Congo Week activities that fully reflect Friends of the Congo's mission.

What the Toolkit Provides:

- **Historical context** and key periods to frame Congo's challenges as structural, not inherent.
- **Guidance on effective messaging** that counters neocolonial narratives by centering Congolese agency, historical causes, and cultural contributions.
- **Key concepts** to shape all communications: neocolonialism, Western-backed Rwandan aggression, tech-funded holocaust, Congo's centrality in Pan-Africanism, and more.
- **Ready-to-use content** for teach-ins, presentations, social media, fundraisers, and campaigns – ensuring factual consistency and Congolese leadership.

Core Principles

The toolkit follows the **Basandja Principles**: listen first, support without directing, build mutuality, and respect ancestral wisdom. It equips organizers to host events that amplify Congolese voices and grassroots solutions.

Daily Themes

Each year, Congo Week follows the same recommended daily themes (see next page). Aligning your events with these themes is highly encouraged, though not required. The essential goal is to tie all activities to the resources in this toolkit.

Daily Themes for Congo Week 2026 - Sovereignty

Use these themes to guide your events while drawing on the educational resources, films, readings, and action tools provided throughout the toolkit.

Day	Theme	Suggested Focus
Sun. Oct. 18th	Congo Sunday	Commemoration and solidarity
Mon. Oct. 19th	Congo's History	Colonialism to present
Tue. Oct. 20th	Patrice Lumumba	Sovereignty and resistance
Wed. Oct. 21st	Congo Resources	Minerals and exploitation (Key Concepts: Tech-funded Holocaust)
Thu. Oct. 22nd	Women	Agency (Key Concepts: Sexual Violence as a Weapon of War)
Fri. Oct. 23rd	Youth	Grassroots organizing (Groups: Youth cooperatives in Basandja Coalition)
Sat. Oct. 24th	Culture and Climate	Celebration of Congo's culture and its pivotal role in climate justice

The rest of this toolkit contains concrete examples of books, stories, articles, documentaries, movies, social media posts, as well as other tools and resources to support organizers during their planning phase.

Beyond Congo Week

Beyond Congo Week, we encourage solidarity with Congolese-led efforts. Mobilize around the Congo throughout the year by:

- Joining FOTC's Breaking the Silence Speakers Tour (February-July 2027) by inviting speakers to your event (sign up: congoweeek.org/bts-tour).
- Supporting partner projects such as Basandja initiatives (e.g., Child Cobbler) or other allies (e.g., Save The Congo).
- Staying connected via newsletter, social media (@congofriends), and action alerts.

Join the Week of Action: Congo Week 2026 will take place from Sunday, October 18 to Saturday, October 24, 2026

WATCH THE
FOOTAGE

A woman and a young child are shown from the chest up. The woman, on the left, wears a red headwrap and a black and white striped shirt. The child, on the right, is also wearing a striped shirt. They are both looking directly at the camera with serious expressions. The background is a landscape with green hills and a blue sky, partially obscured by a red horizontal band at the top.

CRISIS IN THE CONGO

UNCOVERING THE TRUTH

Crisis In The Congo: Uncovering The Truth

Crisis in the Congo exposes how U.S.-backed invasions by Rwanda and Uganda triggered the world's deadliest conflict since WWII, killing millions through war, sexual violence, and resource plunder. The film traces this catastrophe to 125 years of colonialism, dictatorship, and corporate exploitation, offering expert analysis rarely seen in mainstream media. Produced by Friends of the Congo, it's a call to action against the ongoing humanitarian crisis. Learn more [here](#).

LEARN THE FACTS

CONGO

AN OVERVIEW OF ITS GEOGRAPHY, HISTORY AND POLITICS

GEOGRAPHY

The Democratic Republic of the Congo is literally and figuratively the heart of Africa. The country of an estimated 80 million people straddles the equator and is bordered by 9 other countries. It is the size of Western Europe and the fulcrum on which the African continent swings. Congo is the second largest country in Africa in area and the fourth largest in population. Congo is a young country with the majority of its population 18 years old or younger.

HISTORY & POLITICS

Congo is home to one of the oldest mathematical artifacts in the world, the Ishango Bones, a binary counting system and lunar calendar, which dates to 20,000 B.C. The pre-colonial Congo region was governed by federated states. However, since the modern founding of the Congo in 1885 when it was given to King Leopold II of Belgium at the Berlin Conference of 1884/1885 as his own personal property, Congolese have been engaged in a social justice movement to regain control of the country and determine their own affairs.

WHY CONGO MATTERS

Congo is arguably the richest country on the planet in terms of natural resources. It is the storehouse of strategic and precious minerals that are vital to the functioning of modern society. Its minerals are key to the consumer electronics, the technology, automotive, aerospace and military industries. Its diamonds, gold, copper, cobalt, uranium, timber, iron, tin, and coltan (mineral that is central to the functioning of our cell phones, laptops and other technology and electronic devices) are coveted throughout the globe.

Due to Congo's strategic location in the heart of Africa and the lust for her wealth powerful nations have repeatedly intervened in the Congo over the past 125 years. Congo is literally and figuratively the heart of Africa and the fulcrum on which the African continent swings. Former South African president Thabo Mbeki says "there is no new Africa without a new Congo."

CONGO'S POTENTIAL

In spite of the remarkable challenges faced by the Congolese people, they can be overcome, especially in light of Congo's incredible human and natural potential. Congo has the agricultural potential to feed the entire African continent. Congo also has the hydro capacity to provide electricity to all of Africa with some left over to export to Southern Europe and the Middle East. Congo is a part of the second largest rainforest in the world and is vital to the fight against climate change.

PIVOTAL MOMENTS IN CONGO'S HISTORY SINCE 1885

1884

to

1885

Berlin Conference, Congo given to King Leopold II as his own personal property.

1885

to

1908

Brutal reign of Congo Free State by Leopold II. An estimated 10 - 15 million Congolese perished under Leopold's regime of rubber and ivory extraction.

1960

Congo wins its independence from Belgium and elects its first democratic Prime Minister, Patrice Lumumba.

1961

Less than 7 months in office, Patrice Lumumba was assassinated by Western Powers and Congolese elite. Belgium apologized in 2002 for their role in the assassination of Lumumba.

1965

to

1997

The United States installed and maintained Joseph Desire Mobutu in power for over thirty years in spite of a number of attempts by the Congolese people to overthrow his dictatorial regime.

1996

United States and British allies, Rwanda and Uganda led the invasion of the Congo.

1997

Mobutu is overthrown in May and Laurent Kabila is installed in power by Rwanda and Uganda.

1998

US and British backed Rwanda and Uganda invaded Congo a second time in an attempt to remove Laurent Kabila from power whom they had installed in 1997. The second invasion unleashed the death of an estimated six million Congolese, which represents the deadliest conflict in the world since World War Two.

† Desire Kabila was assassinated and replaced by his son Joseph

2002

The war officially ends but the conflict continues to this day, mainly in Eastern Congo.

2006

Joseph Kabila was elected president and served until January 2019.

2019

Felix Tshisekedi, son of former opposition icon Etienne Tshisekedi replaces Joseph Kabila as president in the first peaceful transfer of power since the CIA overthrow of the democratically elected Patrice Lumumba in 1960.

2023

Felix Tshisekedi won a second five-year term in the December 2023 elections.

10 Reasons Why CONGO MATTERS

1.

Congo
have

2.

Congo is the most densely populated country in Africa, with a majority of whom are 18 and under. Congo has the agricultural capacity to feed the entire African continent.

3.

Congo is a part of the second largest rainforest in the world, and is vital to the fight against climate change.

4.

5.

The Congo river has the hydro-electric capacity to light up the entire African continent with power left over to export to Southern Europe and the Middle East.

6.

Congo has over 1,100 minerals and precious metals.

7.

Congo is the storehouse of precious and strategic minerals that are vital to the aerospace, military, automotive, electronics, technology and green/clean energy industries.

8.

There is an estimated \$24 trillion of wealth (equivalent to the Gross Domestic Product of the United States) in Congo's soil.

9.

Congo's music is listened to throughout the continent and serves as a beltway for the transmission of Most importantly, assassinations, invasions and dictators imposed by the West.

10.

Congo has enormous human potential via its youth, women, scholars, scientists and ordinary people who have suffered unnecessarily for far too long due to plunder. It is vital that people of goodwill throughout the world stand with the Congolese people as they pursue peace, justice, and human dignity.

Basic Facts on the Congo

History & Geography

1. Congo is located in the heart of Africa straddling the equator.
2. Congo is bordered by nine other African countries and is the size of Western Europe with a population of 110 million inhabitants.
3. The lingua franca is French however four major languages (Lingala, Kikongo, Tshiluba, and Swahili) are spoken in more than 250 ethnic groups.
4. Congo's Ishango Bones, a binary counting system and lunar calendar, are among the oldest mathematical artifacts in the world, dating to 20,000 BC.
5. The Kongo empire reigned during the period of African enslavement and prior to the Colonization era.
6. Congo was given to King Leopold II of Belgium at the 1884/85 Berlin Conference.
7. King Leopold II ruled Congo as his own personal property for 23 years (1885-1908) during which time approximately 10 million Congolese perished as the King extracted rubber and ivory.
8. As a result of international grassroots pressure, King Leopold II had to relinquish ownership of the Congo to the Belgian state in 1908 and Belgium ruled as a colonial power until 1960.

Politics

1. Congo obtained its independence from Belgium on June 30, 1960 under the elected leadership of Prime Minister Patrice Emery Lumumba who was overthrown within weeks and assassinated within months (January 17, 1961) by Western powers and Congolese sycophants.
2. Pursuant to Lumumba's assassination, the United States installed and backed dictator Joseph Desire Mobutu for over three decades.
3. U.S. allies, Rwanda and Uganda invaded the Congo twice (1996 & 1998) which resulted in the removal of Mobutu in 1997 and the unleashing of the deaths of nearly six million.
4. The overthrow of Mobutu resulted in the installation of Laurent Desire Kabila in 1997, who was assassinated in 2001 and followed by his son Joseph Kabila who remained in power until January 2019.
5. Felix Tshisekedi replaced Joseph Kabila as president of the Congo in the country's first peaceful transfer of power since the overthrow of Patrice Lumumba by Western powers in 1960. Tshisekedi was reelected to a second five-year term in December 2023.

The Tragedy

1. It is estimated that nearly six million people have died as a result of conflict and conflict related causes in the Congo since 1996.
2. Half of those who perished in the conflict are children under the age of five.
3. Hundreds of thousands of women have been raped as a weapon of war.
4. Seventy percent of Congolese live in extreme poverty earning less than \$2 per day.
5. The international community is systematically looting Congo's spectacular wealth.

The Potential

Congo's people represent its greatest potential with a population of 110 million, half under the age of 18.

2. Congo is a storehouse of strategic minerals (cobalt, copper, zinc, gold, diamond, silver, magnesium, germanium, uranium, coltan, petroleum and many other resources), which are vital to global industries such as the military, aerospace, technology, electronics, automobile, jewelry and others.
3. Congo possesses 64 percent of the world's reserve of coltan (a mineral found in cell phones and other electronic devices).
4. Congo is the largest producer of cobalt in the world and the largest producer of copper in Africa.
5. Congo is a part of the second largest rainforest in the world, which is vital in the fight against global warming and climate change.
6. Congo has the hydro capacity to provide electricity for the entire African continent, southern Europe and parts of the Middle East.
7. Congo has the agricultural capacity to feed the entire African continent.

Women of the Congo, their stories...

The physical and psycho-social traumatic effects of the conflict

Maman Nyota (home broken into at night by rebels)

They placed a knife at the throat of my husband and told him to have sex with me in front of them and my father-in-law. My husband refused. They took off his clothes. Then, they placed the knife at his throat again and told him it was his last chance before they kill him. He refused and finally they killed him.

Therese (captured by rebels as a sex slave)

We were accompanied by body guards for everything, even when we went to the toilet ... We had to be at the disposition of the man who raped us all day. It was always the same man. Even if I did not want to, I had to be his concubine. He always had his gun pointed at me and threatened to kill me if I resisted him. If I posed the least resistance, he would hit me.

Maman Nsimire (Raped by rebels in public as a form of humiliation)

They asked for the telephone then money, and threatened to kill us if we did not give it to them. My husband gave them \$100 that I had planned to use for a business project. Then one of the men hit me demanding that I lay down. I refused. He continued to hit me ripping off my clothes until I was subdued. While this was happening, two men held my husband. My children were present and in front of everyone, they raped me.

Surveys:

BERKELEY

66 percent

61 percent of those polled in the east said they witnessed the violent death of a family member or friend

34 percent said they themselves had been abducted for more than a week

53 percent reported being forced to work or being enslaved by armed groups

16 percent had been sexually violated and

12 percent multiple times

JOHNS HOPKINS (Snap Shot of South Kivu Province)

82 percent of rape survivors have STDs

60 percent have lost their husbands

An estimated **30 percent** of rape survivors are HIV positive

Impunity throughout province – estimated **40,000 cases** of rape - only **38 cases** brought to prosecution

Sources for survey:

Situation Analysis: Strengths, Challenges and Opportunities for Sustainable Development in Eastern DR Congo.

The situation analysis was conducted in the Eastern South Kivu Province of the Democratic Republic of Congo (DRC) from July 20-July 29 by Dr. Nancy Glass of Johns Hopkins University School of Nursing and Center for Global Health in partnership with Great Lakes Restoration, the Archdioceses of Bukavu and Programme D'Appui aux Initiatives de Developpement Economique du Kivu (P.A.I.D.E.K).

The International Center for Transitional Justice, the Human Rights Center at the University of California, Berkeley and the Payson Center for International Development at Tulane University conducted a survey of 2,620 Congolese between September and December 2007. The study focused North and South Kivu, Ituri, Kinshasa, and Kisangani.

COLTAN and the CONGO

Modern Uses of Coltan

- Laptop computers
- Cellular phones
- Jet engines
- Rockets
- Cutting tools
- Camera lenses
- X-ray film
- Ink jet printers
- Hearing aids
- Pacemakers
- Airbag protection systems

- Ignition and motor control modules:
GPS, ABS systems in automobiles
- Game Consoles (i.e. XBOX, PlayStation, Nintendo, etc.)
- Video cameras
- Digital still cameras
- Prosthetic devices for humans:
hips, plates in the skull, also mesh to repair bone removed after damage by cancer

What is Coltan?

Coltan is short for Columbite-tantalite - a black tar-like mineral found in major quantities in the Congo. The Congo possesses 64 percent of the world's reserves of coltan. When coltan is refined it becomes a resistant powder that can hold a high electric charge. The properties of refined coltan are vital elements in creating devices that store energy or capacitors, which are used in a vast array of small electronic devices, especially in mobile phones, laptop computers, pagers, and other electronic devices.

Coltan before it is processed into electronics, parts for weapon systems, tools, etc.

Foreign Corporate Exploitation

Over the past 16 years, foreign corporations have been deeply involved in the exploitation of coltan in the Congo. The coltan mined by rebels and neighboring countries (Rwanda, Uganda & Burundi) is sold to multi-national corporations. The United Nations (UN), in four studies from 2001 – 2003, implicated several companies in sourcing coltan from the Congo and say that these companies serve as “the engine of the conflict in the DRC.” Major U. S. players identified by the UN studies include: Cabot Corporation, Boston, MA; OM Group, Cleveland, Ohio; AVX, Myrtle Beach, SC; Eagle Wings Resources International, Ohio; Trinitech International, Ohio; Kemet Electronics Corporation, Greenville, SC; & Vishay Sprague. Malvern, PA.

Corporations from other countries have been a part of the coltan exploitation chain. These companies include but are not limited to Germany's HC Starc and EPCOS, China's Nigncxia, and Belgium's George Forrest International.

Once the coltan is processed and converted to capacitors, it is then sold to companies such as Nokia, Motorola, Compaq, Alcatel, Dell, Hewlett-Packard, IBM, Lucent, Ericsson and Sony for use in a wide assortment of everyday products ranging from cell phones to computer chips and game consoles.

COBALT and the CONGO

Companies Using Cobalt

- Apple
- Amperex Technology
- BMW
- Daimler
- Dell
- Fiat-Chrysler
- Ford
- Hewlett-Packard
- Huawei
- Huayou Cobalt
- Hunan Shanshan
- General Motors
- Glencore
- IBM
- LG Chem
- Microsoft
- Panasonic
- Renault
- Samsung
- Sony
- Tesla
- Toyota
- Vodafone
- Volkswagen

What is Cobalt?

Cobalt is a shiny metal that is a byproduct of the mining of nickel and copper. Its atomic symbol is Co and atomic number is 27. On the African continent, cobalt is found primarily in the Democratic Republic of the Congo (DRC) and Zambia. The DRC is the largest producer of cobalt in the world, producing an estimated 60% of the world's supply. It also has the largest reserves of cobalt with about 50% of the world's reserve of cobalt. Cobalt is used in two key sectors, military and industry. In the military sector it is vital for the functioning of jet engines and in the commercial industry sector it is critical for rechargeable batteries.

Cobalt before it is processed into electronics, parts for weapon systems, tools, etc.

Features

- Identified global terrestrial reserves of cobalt amount to an estimated 25 million tons.
- There is enough land reserves of cobalt to last 100 years.
- D.R. Congo produces more cobalt than all other countries combined.
- 49% of Cobalt demand is driven by batteries in cell phones and electric cars.
- One third of all cars in the world could be electric in 20 years.
- About 45% of the cobalt consumed in the United States was used in superalloys, mainly in aircraft gas turbine engines.
- China is the leading supplier of cobalt to the US but China gets much of its cobalt from Congo-Kinshasa.
- China is the world leading consumer of cobalt.
- Cobalt is a key mineral for the green energy revolution.
- Cobalt is vital for the batteries used for storing wind and solar energy.
- Cobalt contributes to the manufacture of more eco-friendly products.

Minerals and Elements in the Democratic Republic of Congo

The Periodic Table of the Elements is an amazing thing. On a single, highly structured page, it summarizes the identity and properties of all of the atoms that make up Planet Earth. These are grouped into specific entities called “elements” which are typically referred to by scientists as simple, one- or two-letter chemical symbols.

Group →	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Period ↓	1 1 H																	2 He
2	3 Li	4 Be											5 B	6 C	7 N	8 O	9 F	10 Ne
3	11 Na	12 Mg											13 Al	14 Si	15 P	16 S	17 Cl	18 Ar
4	19 K	20 Ca	21 Sc	22 Ti	23 V	24 Cr	25 Mn	26 Fe	27 Co	28 Ni	29 Cu	30 Zn	31 Ga	32 Ge	33 As	34 Se	35 Br	36 Kr
5	37 Rb	38 Sr	39 Y	40 Zr	41 Nb	42 Mo	43 Tc	44 Ru	45 Rh	46 Pd	47 Ag	48 Cd	49 In	50 Sn	51 Sb	52 Te	53 I	54 Xe
6	55 Cs	56 Ba	57 La *	72 Hf	73 Ta	74 W	75 Re	76 Os	77 Ir	78 Pt	79 Au	80 Hg	81 Tl	82 Pb	83 Bi	84 Po	85 At	86 Rn
7	87 Fr	88 Ra	89 Ac *	104 Rf	105 Db	106 Sg	107 Bh	108 Hs	109 Mt	110 Ds	111 Rg	112 Cn	113 Nh	114 Fl	115 Mc	116 Lv	117 Ts	118 Og
				* 58 Ce	59 Pr	60 Nd	61 Pm	62 Sm	63 Eu	64 Gd	65 Tb	66 Dy	67 Ho	68 Er	69 Tm	70 Yb	71 Lu	
				* 90 Th	91 Pa	92 U	93 Np	94 Pu	95 Am	96 Cm	97 Bk	98 Cf	99 Es	100 Fm	101 Md	102 No	103 Lr	

Some of these elements are well known to us:

- carbon (C)—the building blocks of humans and all life-forms on Earth,
- nitrogen (N)—the most abundant gas in the Earth’s atmosphere,
- oxygen (O)—less abundant than nitrogen, but the gas in the atmosphere which fuels human life.

Just as nitrogen is more abundant in air than oxygen, so the various elements in the Periodic Table differ in their abundance in the Earth’s crust — the outer skin of the planet on which we all live. Ten elements, topped by oxygen, silicon, aluminum, iron and calcium, make up 99.2% of the weight of the crust.

All of the other elements on the Periodic Table make up less than 1% of the weight of the crust.

Many of these elements have critical uses in our high-technology advanced industrial society.

But in order to be economically extracted from the crust, we need to find rocks where the concentrations of these desired elements greatly exceeds this average crustal concentration.

There are places where these rare elements are concentrated by geologic processes.

The rocks here constitute ores — rocks that can be mined and processed for a profit.

In the DRC, there are ores of the following elements: copper, cobalt, niobium, tantalum, tin, tungsten, and gold.

Element	Ores (minerals) occurring in the DRC	Selected uses of element
Copper (Cu)	A variety of Copper sulfide minerals	Electrical wire and cable; Electric motors; Integrated circuits
Cobalt (Co)	Heterogenite, a mixed oxide and Hydroxide of Cobalt (CoOOH)	Alloys for gas turbines and jet engines; Batteries in cell phones and Electric vehicles
Niobium (Nb)	Columbite (also called niobite), an Iron, Manganese, Niobium oxide mineral [(Fe,Mn)Nb2O6]	Alloys in jet and rocket engines; Superconducting magnets in magnetic resonance imaging equipment
Tantalum (Ta)	Tantalite, an Iron, Manganese, Tantalum oxide mineral [(Fe,Mn)Ta2O6] Columbite-tantalite ores are typically referred to as coltan (see https://friendsofthecongo.org/coltan/)	Capacitors in cell phones and personal computers; Alloys in jet engines
Tin (Sn)	Cassiterite, a tin oxide mineral SnO2	Solders for electronic circuits; Alloys with zirconium for cladding of nuclear fuel rods
Tungsten (W)	Wolframite an iron, manganese tungstate mineral (Fe,Mn)WO4	Tungsten carbide for cutting tools; Alloys for use in armor- piercing ammunition
Gold (Au)	Native metal, Au	Monetary use; Jewelry; Electrical contacts in personal computers

Much of the world's attention with respect to conflict minerals in the DRC (see full report available at <https://www.globalwitness.org/en/campaigns/democratic-republic-congo/time-dig-deeper/>) has focused on tin, tantalum, tungsten and gold, often referred to as the 3TG.

In the United States, regulations are in place to protect the health and safety of miners, and to protect the air, water and soil of the mining regions. Sadly, in the DRC, such protections just don't exist. The processing of ores to extract the economically important elements exposes sulfide minerals to atmospheric oxygen, and thereby generates sulfuric acid. This acid mine drainage can mobilize toxic metals and threaten surface and ground water resources.

Tailings from these large-scale copper-cobalt operations can be found in streambeds where they act as continuing sources of toxic metals to water supplies. Besides large-scale commercial mining operations, there are thousands of artisanal miners—small-scale, subsistence miners—who are exposed to the danger of tunnel and pit collapses, toxic dusts, and radiation exposure associated with the presence of uranium and thorium in some of these ores.

This has been a glimpse of the science that underlies some of the suffering of the people of the DRC. As end users of many of the high technology products that had their supply-chain origin in the DRC, it is up to all of us to work for the responsible sourcing of raw materials from the DRC.

* Produced by professor Edward R. Landa

FUNDRAISING

MOBILIZE THE RESOURCES

Subject: Support the Fight for a Free and Just Congo
Dear [Recipient's Name],

I hope this message finds you well. Today, I am reaching out to ask for your support in a cause that has urgent relevance: the fight for justice, peace, and self-determination for the people of the Democratic Republic of the Congo (DRC).

The Friends of the Congo (FOTC) has been a tireless advocate for Congo's people since its founding in 2004. As a 501(c)(3) nonprofit organization, FOTC works in partnership with Congolese communities to bring about lasting change in one of the most resource-rich yet war-torn countries in the world. Based in Washington, DC, FOTC has played a critical role in advocating for policies that address the long-standing issues of exploitation, human rights abuses, and foreign intervention that have plagued the Congo.

Why Now?

The situation in the Congo remains dire. From the ongoing exploitation of its people and resources to the humanitarian crisis created by unending conflict, Congo continues to face incredible challenges. But in the face of these struggles, there is hope—through your generosity, we can support the organizations and communities fighting for freedom, justice, and peace.

What We Do

FOTC's efforts are dedicated to advocating for policies that end foreign interference, support Congolese sovereignty, and provide resources for long-term peace-building. By supporting this work, you help us amplify the voices of the Congolese people, raise awareness about the ongoing crisis, and demand action from world leaders.

How You Can Help

We need your support to continue this important work. Your contribution will directly support FOTC's programs, advocacy efforts, and community engagement initiatives. The need is urgent, and your donation, no matter the size, makes a tangible difference. Please consider making a tax-deductible donation today: [Donate Now](#)

Here's how your gift can help:

- \$50 helps fund educational materials for advocacy campaigns.
- \$100 supports outreach to policymakers and key stakeholders on behalf of Congolese communities.
- \$250 provides critical support for organizing community-based peacebuilding initiatives.
- \$500 or more funds a comprehensive research report that raises global awareness of Congo's ongoing struggles.

We also encourage you to share this call for support with your network—together, we can make a bigger impact.

FOTC was founded with the mission to stand in solidarity with the Congolese people, advocating for the realization of their full rights and potential. With a deep commitment to peace and justice, FOTC continues to partner with local organizations in the Congo to ensure their voices are heard and their needs are met.

Your support is not just a donation—it's a powerful statement of solidarity with the Congolese people who continue to fight for the freedom and dignity they deserve.

Thank you for your continued support and for standing with the people of Congo in this pivotal moment.

With gratitude,

Launch an Instagram Fundraising Campaign for Friends of the Congo

QUICK START

1. **Go to your IG profile** → Tap the **"+" (Create)** button → Select **"Fundraiser"**.
2. **Search for "Friends of the Congo"** and select as nonprofit.
3. **Set a goal & deadline**, add a compelling description (you can borrow language from the fundraising letter!)
4. **Share the fundraiser** to your Stories/Feed to maximize visibility.

Define Your Campaign Goal and Message

Set a clear goal; craft a compelling message

Create a Visual Campaign

Design eye-catching graphics using a graphic design tool

Set Up a Fundraising Link

Use Instagram's donation sticker or link to a fundraising platform

Post Engaging Content

Share regular updates, videos, and graphics to encourage donations

Use Hashtags & Tagging

Use relevant hashtags and tag Friends of the Congo (@congofriends)

Engage with Your Audience

Respond to comments and ask followers to share

Create an Instagram Fundraising Challenge

Encourage followers to donate and tag their friends

🔊 **BREAKING THE SILENCE FOR CONGO** 🔊

The Congo is the heart of Africa—rich in land, culture, and resources. Yet for decades, its people have suffered exploitation, violence, and erasure while the world looks away. But we won't. I'm launching this fundraiser for @CongoFriends because their work is **CRUCIAL** to:

Supporting Congolese activists demanding justice

Ending the plunder of Congo's minerals (yes, the ones in your phone)

Amplifying voices the world tries to silence

Goal: [Your \$ Goal] by [Deadline]

Launch a GoFundMe for Friends of the Congo

**‘Donate now’ and
‘Share’ the URGENT
Call for Support for
Goma, DR Congo**

1. Create Your Fundraiser

- Visit GoFundMe.com → Click "Start a GoFundMe"
- Choose category: **"Nonprofit"** or **"Justice & Legal"**
 - **Title:** "Support Free Congo: Fund Justice with Friends of the Congo"
 - **Goal:** Start with \$1,000+ (adjust as needed)
 - **Beneficiary:** Select FOTC or note funds will go to their official donation page

2. Write Your Story (Copy/Paste Ready)

"The Congo fuels our phones, cars, and tech—yet its people face violence and exploitation. Friends of the Congo (FOTC) has fought for 20+ years to change this.

Your donation supports: ✓ Grassroots activism

3. Add Visual Impact

- Cover photo: Use FOTC's logo, a powerful Congo protest image, or edit pre-made graphic in 'Tools'
- Video (optional): Record a 15-second clip: "I'm fundraising because Congo matters. Join me!"

4. Share Strategically

- First post: Tag @CongoFriends + use hashtags:
- #FreeCongo #TechJustice #CongoRising
- Email/text: Send personal asks to 10 close contacts first
- Updates: Post every 3 days ("We're at 60%—help us cross the line!")

5. Donate & Show Proof

- Withdraw funds → Send 100% to FOTC via:
DONATE HERE
- Post a screenshot with donors: "\$1,200 sent to FOTC —THANK YOU!"

3 Pro Tips for More Donations

🔥 **Match Challenge** \$200 in donations!"

🔥 **Tag influencers** with big followings to share

🔥 **Use Stories** : Post donation receipts to build trust
